

Passport™ PTT-V Amplifier

The Passport PTT-V dispatch amplifier provides connection to 6-wire dispatch operations and features a quick disconnect that is compatible with VXI Passport-V series headsets. Easy to set up and to operate, the comfortable pistol grip conforms to the natural shape of your hand. The push-to-talk button and volume adjustments are easily accessible.

The durable, non-locking push-to-talk button has been tested to sustain over 340,000 cycles. Special attention has been given to the cord and its connection points to ensure durability and long life.

The 15-foot cord provides greater mobility and the unit can be secured to the user's waist with the belt clip, or around the neck with the included lanyard.

2 YEAR *Unconditional* WARRANTY

Two ways to wear your Passport-PTT-V dispatch amplifier:

Attach belt clip (1) or remove the clip (2) and use lanyard (3) for around the neck wear.

Compatible with VXI Passport™ V-series or VXI TuffSet™ headsets.

OPERATING AND STORAGE RANGES
Operating and voltage range: 2.5V~5V
Operating current range: 0.12mA~0.95mA
Operating temperature: 0°C to 50°C
Storage temperature: -40°C to 65°C

MICROPHONE AMPLIFIER
Frequency range: 100Hz ~ 8KHz(-6dB)
Distortion: Less than 3% AT 1KHz
Total gain: 15dB + 2dB
Polarity: Non-polarity
Terminal voltage: 3Vdc @ 0.26mA
