

Power-Saving Desktop Solutions

APC Back-UPS ES 650 VA

The Back-UPS ES 650 has been completely updated to include a high efficiency charging system and a modern new look. The new charging circuit is more efficient than any of our competitors' units in the same VA range, which lowers the overall cost of ownership, conserves power and saves money on your electricity bill. The new BE650G was designed specifically to address the growing emphasis on power conservation.

Features

- Eight outlets (4 battery backup & surge; and 4 surge-only)
- Included PowerChute® safe system shutdown software
- USB connectivity
- Dataline surge protection (network/phone) and coax protection

Saves an average of \$12 per year!

By using a high efficiency charger, these new units can **save an average of \$12 per year*** on your electric bill when compared with competitor's models.

APC Back-UPS ES 750 VA

The Back-UPS ES 750 VA, includes the same highly efficient charging system and modern look as the ES 650 but it also has other "green" features designed to minimize environmental impact while still offering the world's most reliable power protection for computer systems and peripherals. It's new high frequency design means the use of less copper is used which results in a smaller overall size and leads to the use of less plastics and less energy to ship it. Advanced features like Master/Controlled outlets that shut off power to printers, scanners and speakers when the computer is not in use saves additional money on electric bills and proves that it is possible to reduce electrical waste and still deliver up to 5 times more efficiency than competitive products.

Features

- Ten surge protected outlets, 5 with battery backup
- Master/Controlled outlets that conserve energy
- Included PowerChute® safe system shutdown software
- Full dataline protection
- 3 year warranty

Saves an average of \$40 per year!

By eliminating "phantom loads", the BE750G can save an additional \$28 per year* when compared with competitor's models, for an **average \$40 total savings per year** on your electric bill.

APC Power-Saving SurgeArrest

Unlike traditional surge protectors, APC's Power-Saving SurgeArrest reduces energy consumption by smartly managing power to electronics while still protecting them from harmful surges and spikes. It helps lower energy bills through the use of Master/Controlled outlets that automatically shut power off to unused peripherals like printers, scanners and speakers when the computer is not in use. By turning off power to these "phantom loads", the P7GT can save an average of \$25 per year* on their electric bill per system it is protecting and will pay for itself in less than 2 years time!

Features

- 7 Outlets
- 6ft extension power cord
- Phone line protection jacks
- UL1449's toughest performance standard of "330V"
- Lifetime Warranty and Equipment Protection Policy

Saves an average of \$25 per year!

The Power-Saving SurgeArrest (P7GT) can **save an average of \$25 per year*** on your electric bill.

* Savings assume 3 hours of computer use per day at \$0.10 per kw/hr with the following equipment plugged into the controlled outlets: all-in-one printer, speakers and external storage device
