

VXI Passport™-G Headsets

Headset Solutions for the Professional Contact Center

- Adjustable, ratchet headband provides operator with a comfortable, secure fit. Single ear model features a slightly curved, soft temple pad.

• Passport 10-G one-ear style

- Highly flexible gooseneck boom is quick to adjust and stays in position for consistent voice input. Rotates for left or right side microphone placement.

- Noise-canceling electret microphone greatly reduces background noise for a more professional sounding call and improved voice clarity.

- High impact plastic and durable components for fewer repairs and long headset life.
- Unconditional two-year warranty.

Passport 20-G dual-ear style

Professional Headsets for use with GN Netcom Amplifiers.

Passport-G headsets provide an immediate connection to the GN Netcom quick disconnect lower cord for easy integration in the contact center.

Designed and built to withstand the high intensity use of the 24/7 contact center, Passport-G headsets are constructed with the same impact-resistant plastic used in sporting equipment, meaning fewer repairs and less hassles.

High quality, durable components ensure clear audio communication on both ends of the call and the ultra comfortable fit reduces agent stress.

An exceptional headset means a more satisfied, productive agent and fewer problems for call center managers. Headsets should make your life easier and the Passport-G does that.

Compatible GN Netcom Amplifier Models:

- 8000
- 8050 TCA
- MPAll
- L8464
- 0686
