

Extend HDMI OVER CAT5e up to 300-feet

Conversions Technology CT60R HDMI Super Extender uses a pair of CAT5e/6 cables to extend HDTV displays up to 300 feet at 1080p.

The CT60 breaks the limitation of the HDMI cables transmission length. With the small form factor CAT5e it is more flexible and is easier to run in tight spaces, than HDMI cable.

Features

- Auto Equalizer
- Small form factor
- Extend 300-feet over cat5e/6
- Rugged housing
- Supports 1080p Displays
- HDCP Compliant
- Power supply included
- RoHS Compliant
