- Rugged housing
- Remote IR control
- Supports 1080P Displays
- HDCP Compliant
- Power supply included
- Power Passing
- RoHS Compliant
- 2 Year Warranty

**Description**

Conversions Technology CT60R HDMI Super Extender uses a pair of CAT-5e/6 cables to extend HDTV displays up to 300 feet at 1080p.

The CT60R breaks the limitation of the HDMI cables transmission length. With the small form factor CAT-5e it is more flexible, and easier to run in tight spaces than HDMI cable.

With the CT60R there is no need for set-top boxes to be located near your HD Display. Auto equalization technology assures a crystal clear picture and with built in IR transmitter/Receiver you have total control the set-top box

**Specifications**
