KX-TS710

USB Speaker / Handset

The KX-TS710 USB speaker/handset does the work of three ordinary devices. It's an Internet speakerphone, a handset, and a high-quality PC speaker. Its easy portability lets you carry it together with your PC for use in the office or anywhere you go.

Silver

Black

Easy Plug-n-Play Set-up

The KX-TS710 connects directly to your PC using a USB cable. The driver is automatically installed.

IP Soft Phone Speaker

Hands-free Internet calls are ideal when you are too busy to leave your PC, or when you want to converse while using the PC.

IP Soft Phone Handset

The handset can be used just like an ordinary telephone, for people who prefer to pick up the phone and hold it to their ear to converse. This also enables private, secure Internet calling because the sound does not leak to other people in the area.

PC Speaker for Easy Listening

If you're not satisfied with the sound quality of your laptop computer, the KX-TS710 can provide high quality 8-KHz sound for easier, more comfortable listening.
