

PLANTRONICS

.AUDIO™ 1100M

UNIFIED COMMUNICATIONS USB HANDSET SOLUTION

Ease the transition to Unified Communications with the familiar design of a telephone handset.

The Plantronics .Audio 1100M USB Handset provides a familiar telephone dial pad and call control buttons as well as a simple button for switching to another device, such as a speakerphone. Fully integrated with Microsoft® Office Communicator 2007, the versatile .Audio 1100M delivers high-quality audio at an affordable price.

- **Familiar interface.** Standard phone design—including 12-key dial pad, call answer/end, mute, and volume control—puts conventional phone users at ease.
- **Unified Communications.** Optimized for Microsoft Office Communicator 2007, users can choose to dial and receive calls via the handset or PC.
- **Versatile.** Users can effortlessly switch between traditional handset and PC audio or another Microsoft Office Communicator device with the touch of a button.
- **Quality audio.** Wideband audio and a noise-canceling microphone boost transmission quality and minimize background noise in busy office environments.
- **Ergonomic ease.** Keypad design is familiar and easy to use. A phone cradle clips to a monitor at a comfortable height for easy, convenient access.
