9380 Series DECT 6.0 Digital Phones

Sold by:

KX-TG9382T 2-Line DECT 6.0 Expandable Digital Cordless Answering System

DECT 6.0 Technology

Engineered to work in 1.9GHz frequency, our DECT 6.0 phones won't conflict with common wireless devices such as 2.4GHz routers, wireless keyboards and mice, microwave ovens and other household items. And because it's digital, you'll enjoy long range and clear sound while deterring eavesdropping.

Phonebook Transfer from Cell Phone via Bluetooth

Transfer up to 600 names and numbers from your cell phone to the built-in directory via Bluetooth. Perfect for business people who constantly add to their cell phone directory and need a simple way to get them on their office phone directory.

Bluetooth Headset

Keep the conversation going and your hands free. Perfect for those times when you're talking, but need to walk around your office or home, open drawers, flip through files or write. Enjoy unprecedented freedom that you can't get from a speakerphone.

Silent Mode

Now you can program each handset to ring or not at your discretion. For example, before you go to sleep, set the bedside handset to Silent Mode so that it won't ring for the duration of your slumber. In the meantime, the handset in another room is unaffected, and rings as usual.
