

Integration Module - HA6001

The Integration Module is the heart of the Unity system, providing the central connection point for Selective Call Intercom, lyriQ Audio, and On-Q Camera Systems.

As the intelligence of the system, the Integration Module generates the Graphical User Interface and can be upgraded for additional functionality with software updates."

FEATURES

- Directly Connect up to two cameras
- Video Q-Link ports allow direct connections of up to two Selective Call Video Door Units
- Q-Link technology allows communications with all On-Q Home Systems products
- Connect as many as 32 Selective Call Intercom Units to the Unity Home System with the Cascade out port
- Requires PW1060 Power Supply
