## KSU Phone Distribution System

Channel Vision's KSU Phone Distribution System provides a simple interface between individual stations and the KSU control unit. Model C-0434 and its associated components create a hassle-free method of installing a phone unit by keeping all wires and connections organized and accessible at a central location.

### Features:

- Compatible with Panasonic® KXTA-624 KSU and most other systems utilizing modular style connectors
- Up to 8 CO line inputs via 110 punches
- Optional RJ-45 connection (CO's 1-8)
- CO line 1 isolation for connection to security equipment
- Test port to speed system testing and installation
- 10 station side connections via 110 punch (expandable via C-0499)
- Up to 4 door stations easily attached
- Outputs on both RJ-11 and RJ-14 connectors for compatibility with both single and two-pair systems
- Dimensions: 8.5" (L) x 5.2" (W) x 1.2" (D)
