

# VXi Passport® 21

## Single-wire Binaural

**The Passport 21 single-wire binaural headset is designed for contact center and office professionals. Passport headsets are used in many leading companies worldwide that depend on them for clear and consistent communications.**

**Lightweight and Comfortable:** The Passport 21 builds upon VXi's experience designing headsets to be worn all day long. It is lightweight and adjustable to provide the best possible fit every time.

**Sound Quality:** Passport headsets are equipped with noise-canceling microphones and high quality audio receivers to provide clear and consistent communications on both ends of the call.

**Durability:** Passport headsets are built with the demands of constant daily use in the contact center in mind.

**Compatibility:** Available with VXi, Plantronics compatible and GN Netcom compatible quick disconnect styles to ensure that the headset easily integrates with the current installed base of products. Direct connect versions are available for phones with built-in headset ports.

## Single-wire Binaural

### Key Features

**Single-wire binaural.** Single-wire design allows a greater range of motion for the user while being lighter weight and improving all-day wearing comfort

**Noise-canceling microphone.** Available in all Passport headsets, the noise-canceling microphone ensures that only the user's voice is heard and not the background noise.

**Excellent receiver audio quality.** High quality audio receivers, combined with the binaural design, ensure that the user hears the person on the other end of the call every time.

**Adjustable, flexible microphone boom.** Gooseneck microphone boom design ensures constant and proper microphone placement.

**Durable.** Designed to last, the Passport 21 headset can withstand the constant demands of constant daily use in the contact center.

**Hearing protection.** This feature helps to avoid sudden and unexpected sound spikes (such as fax machine noises).

**Warranty.** 2-year warranty.
