

SpectraLink

LINK 6020 WIRELESS TELEPHONE

BENEFITS

- Provide consistent, high-quality communications throughout the workplace
- Improve mobility, responsiveness and productivity for employees on-the-move
- Minimize training and administration time through simple handset operation
- Increase productivity through text messaging applications
- Enhanced durability for use in markets such as healthcare and retail

LINK WIRELESS TELEPHONES

The Link Wireless Telephone is the industry's most dependable handset for the workplace. Only SpectraLink combines innovative design with advanced manufacturing and test processes to ensure handset durability. The rugged one-piece design has no moving parts or external antennae, so there is nothing to break or come loose. Link Wireless Telephones seamlessly integrate with a variety of host telephone systems to provide advanced calling features throughout the workplace.

Link Wireless Telephones provide a variety of options to meet the demanding needs of wireless workers on-the-move. Whether you operate in a noisy manufacturing or retail establishment or need discrete communications in a healthcare environment, Link Wireless Telephones help you get the job done quickly, quietly and efficiently.

THE LINK 6020 WIRELESS TELEPHONE

The Link 6020 Wireless Telephone enhances the industry-leading Link Wireless Telephone System (Link WTS) by adding productivity features, improving handset usability and increasing overall handset durability.

Highlighted productivity enhancements of the Link 6020 Wireless Telephone include a speakerphone for hands-free operation and new lithium-ion Battery Packs that

dramatically increase overall talk and standby times. For users in 24-hour operations, Link Wireless Telephones support multiple charging options to ensure employees stay productive and mobile around-the-clock.

The Link 6020 Wireless Telephone enhances usability by uniquely blending a slim lightweight design with a large display and navigation cluster for simple handset operation and access to frequently used features. Through a new software update utility, system administrators can ensure that the most recent software updates and features are available to wireless users throughout the facility.

SpectraLink designed the Link 6020 Wireless Telephone as an extremely durable handset able to withstand the rigors of most working environments while maintaining an attractive design for general office and management personnel. Supporting the IP 53 standard for resistance to spraying water and dust allows the Link 6020 Wireless Telephone to survive the daily punishment of harsh environments.

A wide variety of carrying options and headsets are also available to simplify user operation and protect investment made in wireless technology.

SPECTRALINK - PUTTING WIRELESS TO WORK

SpectraLink helps thousands of commercial enterprises improve productivity, responsiveness and customer service. SpectraLink's integration capabilities, scalable architecture, excellent voice quality and durable handsets make Link WTS the one clear choice for workplace wireless communication.
