

FLUSH BRASS
Delivery Systems
3 Service: Power & Voice/Data
UL Listed

HUBBELL

Fire-Rated Poke-Through

Plastic Floor Box

Finally, all-brass 3 service capability in a single flush service fitting. Hubbell has expanded its line of Flush Delivery Systems to include deluxe brass covers for fire-rated poke-throughs and plastic floor boxes. Previously, the only 3 service solution to this requirement was multi-gang floor boxes and several brass covers. Now Hubbell combines the elegance of brushed brass and the flush delivery of power and voice/data. Why go to 3 gangs of brass for power and voice/data, when you can accomplish this with one Hubbell service fitting?

Hubbell also gives you 3 service options within its brass family:

- Flush brass fire-rated poke-through (with standard duplex receptacle or isolated ground receptacle)
- Flush brass cover for plastic floor box (select your own receptacle: standard duplex, isolated ground, 15A Twist-Lock™)

When you need to combine elegance with 3 service capability, the choice is Hubbell Brass Delivery Products.

FEATURES

Brushed brass cover and matching carpet flange

Flush brass service fittings are provisioned for 3 services

Covers have spring-loaded duplex flaps

Poke-through and plastic floor box covers have a uniform look

Equipped with 2 versatile low-voltage knockouts

BENEFITS

Provides an elegant, pure brass look, unlike inferior brass plated or painted offerings.

Power and voice/data in one unobtrusive unit.

Self-closing flaps keep debris out of receptacle, reduce trip hazards, and prevent breakage.

Mix and match as required and maintain a consistent appearance: plastic floor box on grade level, poke-through for above grade.

Outfit these brass units with the bushed opening provided for voice/data cabling or opt for the low-profile modular jacks.
