

**C195**  
**Cardioid Handheld Condenser Microphone**

Designed for demanding vocalists, the C195 low noise, electret condenser microphone delivers superlative performance on-stage. Transformerless electronics optimize the C195's low frequency response while reducing distortion. The C195's Flex-Form™ hardened steel grille screen dramatically resists deformation while diminishing the risk of poor performance caused by a bent or dented ball screen. CAD's (I.N.R.™- 3) Impact Noise Reduction system optimizes performance in live settings. A durable "soft-feel" coating provides additional protection and reliability. Mic clip and 15' XLRM to XLRF microphone cable included.

Specifications	
Operating Principal	Permanently-Biased Condenser
Polar Pattern	Cardioid
Frequency Response	55Hz – 20KHz
Sensitivity	-35 dBV (18 mV) @ 1 Pa
Impedance	500 ohms
Max SPL	132 dB (pad engaged)
Self Noise	22 dBA
Power Requirements	P12, P24, P48, 5 mA
