

## Bring Power and Communication Services Directly to the Workstation

Protection from  
water, dirt,  
and debris.

**F**lush Style Poke-Thru Devices from Wiremold/Legrand are an excellent solution for bringing power, communication, and audio/video services to the workstation in an open space, above-grade floor environment. All Wiremold/Legrand Flush Style Poke-Thru Devices come with built-in TopGuard™ protection, an industry-leading design that meets and exceeds UL scrub water exclusion requirements for tile and carpet floors. Topguard protection prevents water, dirt, or debris from entering not just the power devices, but also the communication devices.

All Wiremold/Legrand Flush Style Poke-Thru Devices can be installed on tile, carpet, or wood covered floors. Each of these devices provides an excellent solution for both new or retrofit construction, with typical applications that include office buildings, airports, malls, shopping centers, libraries, and schools.

RC7 Flush Poke-Thru Series

AV3 Flush Poke-Thru Series

RC3 Flush Poke-Thru Series

RC4 Flush Poke-Thru Series

AMD8 All Communication  
Flush Poke-Thru Series

### Features & Benefits

- **The new AV3 Series is specifically designed to meet the growing needs of the audio and video market.** The AV3 Series accepts the Extron® MAAP Series mini architectural adapter plates. The MAAP line includes passive A/V connector plates that support a wide variety of video, audio, control, voice and data connectors, as well as active modules such as VGA line drivers, audio buffers and twisted pair transmitters. (Extron devices sold separately only through authorized Extron dealers.)
- **The new AMD8 Series is designed to meet the growing need for more communication capacity at the workstation.** The AMD8 is the largest capacity all communication poke-thru device on the market, providing up to 8-ports for communication devices. The AMD8 is a flush style device with individual slide covers to prevent water, dirt and debris from entering the communication devices.
- **TopGuard Protection.** Integral design component that prevents water, dirt and debris from entering power and communication compartments. Whenever you see the TopGuard protection icon on any Wiremold product, you'll know it meets and exceeds UL scrub water exclusion requirements for tile and carpet floors.
- **UL Listed and UL Fire Classified to U.S. and Canadian safety standards for tile and terrazzo.** Includes the new UL requirements under UL514A and UL 514C for the scrub water exclusion test for carpet and wood covered floors.
- **Multiple service capability.** RC7, RC3, and RC4 Series provide power and communication services. The RC3 and RC4 Series provide for use of flush or recessed fiber optic devices. Eliminates the cost of a second poke-thru to accommodate additional services.
- **Provides flexibility with a single poke-thru unit.** 20A duplex receptacle in the RC3, and the RC7 Series can be wired as standard or isolated ground receptacle. Two 20A duplex power receptacles in the RC4 Series are wired with a 6-wire system with individual neutral and ground wires, and can be wired for standard or isolated ground. RC9 quad 15A receptacle can also be wired as standard or isolated ground receptacle.
- **Individual slide covers.** Protects power and communication devices. Power slide covers snap back into place when receptacle is not in use. Activate either power or communication services, simultaneously or individually. RC9AMD and AMD8 Series Poke-Thru Devices are the only all communication poke-thru devices available with slide cover protection.
- **Datacom connectivity options.** Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point-of-use.
- **"Step-on-it" installation.** Quick and easy installation without the need for additional fasteners or a second installer.
- **Suitable for use in air handling spaces.** In accordance with Sec 300-22(C) of the National Electrical Code.
- **Meets ADA Accessibility Guidelines.** Wide trim flange on the product is designed to meet the ADA Accessibility Guidelines as it pertains to ADA Standard 4.5 which addresses changes in floor and ground surface levels. The poke-thru trim flanges are beveled so the slope is no greater than 1:2 ratio.
- **Fire rated for up to 2-hour rated floors.** Maintains the fire classification of the floor.

## RC7 Series Ordering Information

- GY** – Gray painted flange with gray nonmetallic cover,
- BK** – Black painted flange with black nonmetallic cover,
- VY** – Ivory painted flange with ivory nonmetallic cover,
- AL** – Brushed Aluminum flange with black nonmetallic cover
- BS** – Brushed Brass flange with black nonmetallic cover
- AA** – Brushed Aluminum flange with aluminum-colored nonmetallic cover
- AB** – Brushed Brass flange with brass-colored nonmetallic cover

Where applicable, slide covers match the cover color.

**NOTE:** See page 17 for specifications.

## RC3 Series Ordering Information (Continued)

Catalog No./Item	Description/Specifications	Catalog No./Item	Description/Specifications
<b>RC3KTCGY</b> <b>RC3KTCBK</b> <b>RC3KTCAL</b> <b>RC3KTCBS</b> <b>RC3KTCVY</b>	<b>Retrofit Kit – Used to upgrade existing installations of RC3 Poke-Thru Devices on carpet floors to meet scrub water requirements.</b> Includes 20A duplex receptacle that can be wired as a standard duplex or isolated ground. Also includes scrub water finish flange and slide holder assembly. Flange available in painted black (BK), gray (GY), ivory (VY), and brushed metal finishes in aluminum (AL), and brass (BS). Kit also includes duplex receptacle barrier. Old barrier must be replaced with new. See installation instructions with retrofit kit for complete installation details.	<b>RC37REC</b> <b>RC37REC-25</b>	<b>Replacement Receptacle –</b> Prewired snap-in 20A receptacle can be wired as standard duplex or isolated ground. Available only in black. See installation instructions with replacement receptacle for complete installation details. The RC37REC-25 is available with 25 foot leads and can be wired as standard duplex or isolated ground. <p><b>NOTE:</b> The 20A duplex receptacle supplied with the scrub water version RC3 Poke-Thru Device is proprietary and can only be replaced with the RC37REC or RC37REC-25.</p>
<b>RC3APTCBK</b> <b>RC3APTCGY</b>	<b>Abandonment Plate –</b> Abandonment available in black (BK), gray (GY). <p><b>NOTE:</b> To abandon the RC3 Series Poke-Thru Device, the internal gasket, duplex receptacle, and communication modules must not be removed in order to maintain UL Classification. Also the stem must remain in the core-drilled hole.</p>	<b>ABPLUG4</b>	<b>Abandonment Plug Assembly –</b> Complete plug assembly for abandoning an open 4" [102mm] cored-hole. Assembly includes intumescent fire-stop material to maintain the fire-classification of the floor, integral retainer ring to prevent the unit from pulling up through the floor, and a black die-cast aluminum cover.

**NOTE:** See page 17 for specifications.

## RC3 Series Poke-Thru Exploded Views

### Ortronics

*RC3 Assembled Unit shown with two Ortronics TracJack Category 5e modular jacks (not included).*

### Ortronics

*RC3C Cover Assembly shown with Ortronics TracJack bezels. Ortronics Series II bezels also included. TracJack and Series II modular inserts must be purchased separately.*

### Pass & Seymour

*RC3A Assembled Unit shown with two Pass & Seymour Category 5e TechChoice modular jacks. (Modular Jacks sold separately.)*

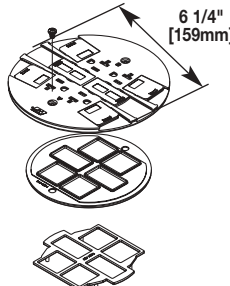

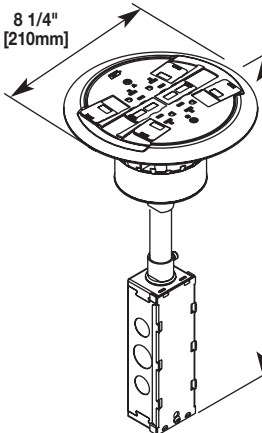

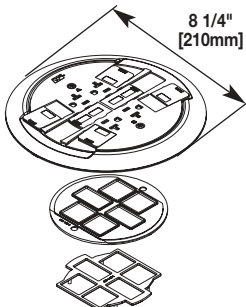

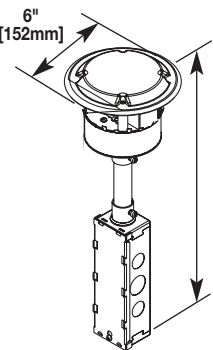

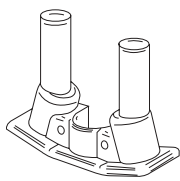

### Pass Seymour

*RC3C Cover Assembly shown with Wiremold (unloaded) keystone open system inserts. Keystone jacks, as well as other Activate 2A Series multimedia jacks must be ordered separately. (Modular Jacks sold separately.)*

**NOTE:** See page 17 for specifications.

## RC4 Series Poke-Thru Exploded Views

### Ortronics

**RC4 – Mounting of two Ortronics TracJack Category 5e modular jacks in the flush position. Will accept a total of four TracJack modular jacks in the flush position. (Modular Jacks not included.)**

### Ortronics

**RC4 – Mounting of one Ortronics TracJack Category 5e modular jack in the recessed position. Will accept a total of two TracJack modular jacks in the recessed position. (Modular Jacks not included.)**

### Pass & Seymour

**RC4-Mounting of four keystone connectors in the flush position. (Jacks sold separately.)**

### Pass & Seymour

**RC4 – Mounting of two fiber optic inserts (sold separately) in the recessed position. (Jacks sold separately.)**

## Flush Poke-Thru Series Specifications

### Copper Cross Section:

The copper cross-sectional area determines the amount of wire fill capacity in a poke-thru device. Unlike other wire and cable management systems that utilize wire fill capacity, a poke-thru device is UL tested under fire conditions to determine the maximum amount of copper conductors that will pass through a poke-thru device, while maintaining the fire-rating of the floor assembly. All Walker Flush Style Devices are UL Classified to U.S. and Canadian safety standards (see complete marking on product) to accommodate at a maximum rating as follows:

#### RC7 SERIES

**Maximum Allowable Copper Cross-Sectional Area:**

**RC7 Power Compartment Only** = .01536 sq. in. [9.91mm<sup>2</sup>]

**RC7 Each Communication Compartment Only** = .0040 sq. in. [2.58mm<sup>2</sup>]

**NOTE:** The RC7 Series requires a 3" [76mm] cored hole.  
(American made core bit having an outside diameter of 3 1/16" [78mm].)

#### RC9 SERIES

**Maximum Allowable Copper Cross-Sectional Area:**

**RC9 Power Compartment Only** = .01536 sq. in. [9.91mm<sup>2</sup>]

**RC9 Each Communication Compartment Only** = .0040 sq. in. [2.58mm<sup>2</sup>]

**NOTE:** The RC9 Series requires a 3" [76mm] cored hole.  
(American made core bit having an outside diameter of 3 1/16" [78mm].)

#### AV3 SERIES

**Maximum Allowable Copper Cross-Sectional Area:**

**AV3 Power Compartment Only** = .01536 sq. in. [9.91mm<sup>2</sup>]

**AV3 Communication Compartment Only** = .01938 sq. in. [12.503mm<sup>2</sup>]

**NOTE:** The AV3 Series requires a 4" [102mm] cored hole.  
(American made core bit having an outside diameter of 4 1/16" [103mm].)

#### RC9AMD SERIES

**Maximum Allowable Copper Cross-Sectional Area:**

**RC9AMD Communication Compartment** = .01600 sq. in. [10.324mm<sup>2</sup>]

**NOTE:** The RC9AMD Series requires a 3" [76mm] cored hole.  
(American made core bit having an outside diameter of 3 1/16" [78mm].)

#### AMD8 SERIES

**Maximum Allowable Copper Cross-Sectional Area:**

**AMD8 Communication Compartment Only** = .03474 sq. in. [22.412mm<sup>2</sup>]

**NOTE:** The AMD8 Series requires a 4" [102mm] cored hole.  
(American made core bit having an outside diameter of 4 1/16" [103mm].)

#### RC3 SERIES

**Maximum Allowable Copper Cross-Sectional Area:**

**RC3 Power Compartment Only** = .01536 sq. in. [9.91mm<sup>2</sup>]

**RC3 Each Communication Compartment Only** = .008 sq. in. [5.16mm<sup>2</sup>]

**NOTE:** The RC3 Series requires a 4" [102mm] cored hole.  
(American made core bit having an outside diameter of 4 1/16" [103mm].)

#### RC4 SERIES

**Maximum Allowable Copper Cross-Sectional Area:**

**RC4 Power Compartment Only** = .03072 sq. in. [19.82mm<sup>2</sup>]

**RC4 Each Communication Compartment Only** = .008 sq. in. [5.16mm<sup>2</sup>]

**NOTE:** The RC4 Series requires a 4" [102mm] cored hole.  
(American made core bit having an outside diameter of 4 1/16" [103mm].)

### IMPORTANT!

The above maximum copper cross sectional area values are for each individual power and communication compartment. DO NOT add values together for any one compartment.

**CAUTION!** Core bits vary in size from manufacturer to manufacturer:

- Use a 3" [76mm] American made core bit having an outside diameter of 3 1/16" [78mm]. Minimum hole diameter: 3 1/16" [78mm].
- Use a 4" [102mm] American made core bit having an outside diameter of 4 1/16" [103mm]. Minimum hole diameter: 4 1/16" [103mm].

### Copper Cross Sectional Area of Commonly Used Conductors

Size	Solid	
#24	.00032 sq. in.	[.206mm <sup>2</sup> ]
#22	.00050 sq. in.	[.322mm <sup>2</sup> ]
#14	.00323 sq. in.	[2.083mm <sup>2</sup> ]
#12	.00512 sq. in.	[3.303mm <sup>2</sup> ]
#10	.00815 sq. in.	[5.258mm <sup>2</sup> ]
# 8	.01296 sq. in.	[8.361mm <sup>2</sup> ]

**NOTE:** Use above values for solid or stranded conductors.

### Concrete Thickness Min/Max:

**1-HOUR RATED FLOOR** – 2 1/4" [57mm] min over top of deck (or 3" [76mm] thick reinforced concrete slab) to a maximum of 7 1/2" [191mm].

**2-HOUR RATED FLOOR** – 3 1/4" [83mm] min over top of deck (or 4" [102mm] thick reinforced concrete slab) to a maximum of 7 1/2" [191mm].

### Floor Coverings:

The poke-thru device is fire rated for carpet and wood covered concrete floors, and tile floor coverings 1/8" to 3/4" [3.2mm to 19.1mm] thickness. For floor coverings not listed above, consult factory.

**CAUTION:** These devices are suitable for 1, 1 1/2, and 2 hour rated floor assemblies as described in the UL Fire Resistance directory for each service.

These devices meet all UL scrub water requirements, but are not suitable for wet or damp locations, or other areas subject to saturation with water or other liquids such as commercial kitchens.

## Notes

**NOTE:** The material that is used in Walker Poke-Thru devices is not listed under the directory for Fire Stopping Material because the poke-thru device is UL Classified as “Outlet Boxes and Fittings Classified For Fire Resistance (CEYY)”. The pass/fail criteria comes from UL263. The pass criteria is that the poke-thru unit cannot exceed 325° F. above ambient before the concrete slab (or deck) reaches this same temperature. Some poke-thru devices are tested for 2 hours while others are tested for 4 hours. The intumescent material has never been tested as a fire-stopping material as a stand-alone device. This material is designed to work as a unit with the entire poke-thru device.

# Datacom Connectivity Options

Now you have a wide range of options for providing datacom connectivity into Wiremold® Cable Management Systems. They are:

- Ortronics® TracJack® and Series II Modular Connectivity Solutions
- Pass & Seymour Activate™ Modular Inserts
- Open System Communication Modules

Use these icons to determine connectivity options for each Wiremold System component:

## Ortronics® Connectivity

### TracJack® Individual Jack System

- Front-loading, snap-in design supports future moves adds and changes
- Inserts for voice, data, audio, and video
- Available Category 3, 5e, 6, USOC 6-position, and other media
- Choice of 13 colors and color matched to Wiremold Systems
- Universal T568A/B wiring format

### Series II Front-Loading, Module System

- Module design features easy snap-in front-loading design
- Linear 110 punch down format for easy termination
- Inserts for voice, data, audio, and video
- Available Category 3, 5e, 6, USOC 6-position, and other media
- Color matched to Wiremold Systems

For detailed product selection refer to the Ortronics Catalog or visit [www.ortronics.com](http://www.ortronics.com).

## Pass & Seymour Legrand Network Wiring

### Activate™ Series Front-Loading Inserts

- Modular inserts for voice, data, audio and video applications
- Front-load, snap-in design
- Color and texture matched to Wiremold Systems
- Available Category 3, 5e, 6, as well as 6-position USOC
- Universal T568A/B wiring format

For detailed product selection refer to the Pass & Seymour Network Wiring Catalog or visit [www.passandseymour.com](http://www.passandseymour.com).

## Open Connectivity Solutions

### Wiremold Open System Communications Modules

- Accommodate a wide range of manufacturers' communications outlets including keystone jacks, as well as proprietary solutions from Avaya (Lucent) and NORDX
- Modules insert into a wide range of Wiremold Systems
- Pre-punched faceplates accept common communication devices

**NOTE:** For more information on integrating connectivity into Wiremold Cable Management Systems contact the Wiremold Applications Engineering Team or your local Wiremold Sales Representative.
