Bluetooth
Bluetooth connection to any mobile telephone

OVERVIEW

Call Mynah is the world's first Call Recorder for all mobile phones. It quickly and conveniently connects to any mobile phone using Bluetooth and is packed with professional call recording features for the most demanding user. **Call Mynah** can even announce to callers that your calls are being recorded.

You can choose to record all calls or only specific calls to or from your mobile phone. If you answer a call from the **Call Mynah**, it is automatically recorded. Calls you don't want to be recorded can be answered from your mobile phone. Outbound calls can be initiated from the **Call Mynah**, or dialed using your mobile phone. In addition, you can switch any call to the **Call Mynah** by selecting **Call Mynah** from your Audio Source list on your mobile phone.

The **Call Mynah** can operate similar to your mobile phone. You can make and process calls from the **Call Mynah** when paired with your mobile from the Handset, the Speakerphone or from the supplied Headset. You can even leave your mobile phone in your bag or pocket and answer and make calls with only the **Call Mynah**. **Call Mynah** can ring, flash or vibrate on incoming calls along with your mobile phone.

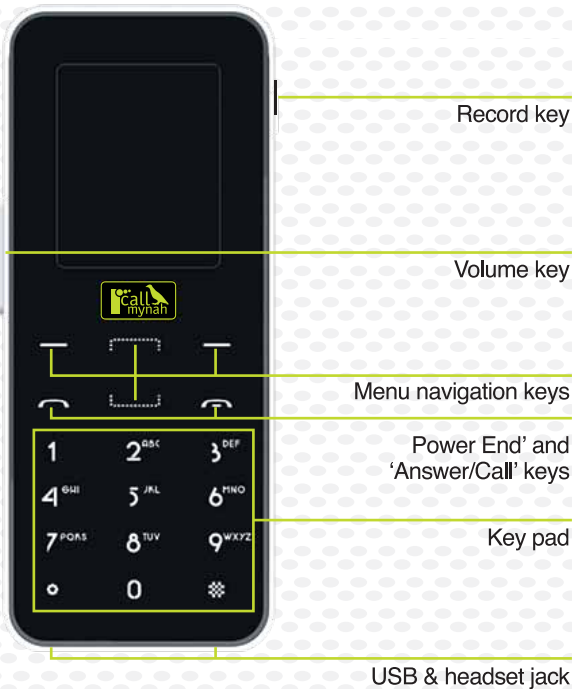

Call Mynah receives Caller ID for every call and is able to record all the details including date, time, duration, caller ID, number dialed and call type (incoming, outgoing, unanswered etc.).

PC SOFTWARE & MANAGEMENT

The XtR Desktop software supplied allows you to upload all your recordings onto your PC (via USB) and manage them:
