SC Fiber Optic Connectors

specifications

SC field polish connectors are TIA/EIA-604 FOCIS-3 compliant. SC simplex and duplex connectors are field terminable. The fibers shall terminate in 2.5mm ceramic ferrules with non-optical disconnect functionality and an average insertion loss of 0.1dB (multimode) and 0.15dB (singlemode) per mated pair.

key features and benefits

Free floating housing	Ensures complete latching even when inserted by the boot; valuable in high-density spacing applications
Pre-assembled inner inner housing	Fewer parts simplifies assembly and reduces installer error for lower installed cost
Full length adhesive fill tube	Prevents adhesive from entering internal cavity of connector to reduce installer error
Non-optical disconnect	Maintains data transmission under tensile loads for jacketed cable for network reliability
Anaerobic adhesive field installation	Simplifies and reduces installation time by 50% compared to heat cured epoxy terminations; curing oven/time not required
High temperature thermoplastic design	Allows use of high glass transition temperature epoxies with cure temperatures up to 150°C (302°F)
Simplex available with 900µm and 3.0mm or 1.6 – 2.0mm boots	One connector part number for both fiber types for easier ordering and stocking
Standard 2.5mm ceramic ferrules	Provide the highest durability for repeated matings

applications

Panduit SC Fiber Optic Connectors are used for equipment cross-connects or interconnects in backbone, horizontal and work area applications. SC connectors are recommended by TIA/EIA-568-B.3 at the wall outlet and the
