

# LINESHARE 3.1™

## Eliminates Expensive Phone Lines

## AUTOMATICALLY ROUTES CALLS TO THE CORRECT DEVICE WITH ONE PHONE LINE

With Lineshare 3.1, you can reduce how many phone lines you need to run your business. Setting up the unit is easy and takes only a few minutes. You just connect your phone, answering machine and fax or modem to the ports in back of the unit. Lineshare 3.1 starts switches incoming calls to the right device automatically.

Using Lineshare 3.1 can save you a lot of money because you won't have to add expensive extra phone lines for each piece of equipment.

## SUPPORTS MANY TELEPHONE COMPANY SERVICES

Lineshare 3.1 is compatible with many telephone company services such as voice mail, caller ID, Distinctive Ring and DSL.\* You can customize your Lineshare 3.1 unit using a touch-tone telephone if the factory settings do not meet your needs. For more information on Lineshare 3.1, please call us at 800.437.4996 or go to [www.pager.net](http://www.pager.net).

\*DSL service requires activation from your local DSL provider. Voice mail requires Distinctive Ring Service. Please check with your local phone company for availability.

## HOW IT WORKS:

- Voice calls are sent to your phone
- Messages are sent to your answering machine
- Faxes are sent to your fax machine, or
- Data calls are sent to your PC

With a standard phone line, only one device can be in use at a time, but if you have DSL service, you could receive voice and fax calls even if you're online.\*

## FEATURES:

There are 29 user programmable features in Lineshare 3.1. Some of the more popular features are:

- Manual transfer capabilities
- Barge-in protection
- Programmable security codes
- Junk-fax screening
- Incoming call priority
- Message notification
- Extension call routing
- Extension phone detection and more
