Brand Features

JBL systems measure up to a higher standard than “home” theater, because more JBL speakers are found in film recording studios and behind the screens of the world’s best movie theaters than any other brand. In the Leviton Architectural Edition powered by JBL program, the same professional features and technologies that set JBL apart from the rest in professional applications are now available for installation into advanced home theater systems—including leading-edge driver materials for clarity and definition, advanced crossover networks for signal purity, and “overbuilt” magnetic structures for maximum output and long-term reliability. Even the acoustically transparent grilles concealing this speaker technology are inspired by JBL’s years of professional experience in behind-the-screen theater sound systems. Leviton Architectural Edition powered by JBL speaker systems are sure to bring the home theater experience to a whole new level. AESUB Powered 12 inch Subwoofer with 400-Watt Amplifier A free-standing (non-installed), powered (amplified) subwoofer which can be used to reinforce the performance of in-wall and in-ceiling installed speaker systems. The AESUB can be unobtrusively placed behind furnishings to provide a high-impact low-frequency acoustical foundation to make sound effects come alive and complete the home theater viewing experience. Adjustable phase and crossover controls allow the subwoofer to be matched to a wide range of listening rooms and systems.

Item Description

Leviton Architectural Edition powered by JBL Powered 12" Subwoofer, 400 Watts for use with Shelf/In-Wall/Ceiling Home Theatre Systems

Features and Benefits

- A free-standing (non-installed), powered (amplified) subwoofer that can be used to reinforce the performance of in-wall and in-ceiling installed system.
- Can be unobtrusively placed behind furnishings to provide a high impact low-frequency acoustical foundation making sound effects come alive and complete the home theater viewing experience.
- High efficiency, high current switching amplifier
- JBL’s PolyPlas™ woofer for low frequencies
- FreeFlow™ flared port for increased bass response without unwanted distortion or boominess
- Variable low-pass crossover frequency controls and a phase switch allow the AESUB to be adjusted to a room’s particular acoustics and an individual’s personal preference
- LFE and line level inputs for maximum connection flexibility
