

# VXi BlueParrott® Xpress™

Slim and lightweight, the VXi BlueParrott Xpress blocks out even the noisiest environments—like city traffic, a busy construction site, or the roar of an 18-wheeler's engine.

## The lightweight knockout that knocks out more noise.

If you work or drive in a noisy environment, and spend a good part of your day on the phone, we'd like to introduce you to your next headset: the VXi BlueParrott Xpress. The VXi BlueParrott Xpress is a sleek, lightweight (just 0.6 oz), Bluetooth® headset that—thanks to VXi's Xtreme Noise Suppression™ technology—is ideal for use wherever excessive background noise is an issue. Its wideband audio delivers natural sound quality for consistently accurate communication. A2DP support means you can also use the Xpress with your GPS, music player and other Bluetooth-enabled devices. When interfacing to another A2DP-enabled device, it provides superior audio and music quality.

- **Xtreme Noise Suppression**, together with wind suppression technology eliminates background noise from any source (the Xpress eliminates 94% of all background noise).
- **Wideband audio** sounds clear and natural, for better communication and fewer misheard words.
- **A2DP** to use with GPS, music players, laptops and other Bluetooth-enabled devices.
- **Over 7 hours of talk time** on a single charge means the BlueParrott Xpress is ready when you are.
- **Lightweight, attractive design** is easy to wear—all day, every day.
- **Multipoint pairing** lets you use both your work and personal cell phones or connect to a Bluetooth PC.

# Nothing knocks out more noise than a BlueParrott.

## On the road or at a work site, knock out the noise with the Xpress.

**Clear communications.** Add cutting-edge noise canceling to wideband audio and get more done, more quickly.

**Safer, less distracted users.** Stability and comfort, together with sharp sound quality, help wearers stay focused.

**Multi-device, multi-use.** With multipoint pairing and A2DP support, one Xpress does it all.

**Go far, stay private.** A range of up to 66 feet gives you twice the wireless freedom compared to most other Bluetooth headsets, while 128-bit data encryption keeps your calls secure.

**More ways to use your Xpress.** With A2DP support, you can listen to your GPS navigation system direction in your headset and enjoy music by connecting to your Bluetooth-enabled music players.

### Voice prompts

mean no more wondering what the coded "beeps" mean.

### Multifunction button

controls on/off, call answer/end and pairing.

### Flexible microphone boom

for perfect mic placement.

### Wide range of speaker volume adjustments

ensures you always hear the conversation.

## Why Wideband Audio?

In simple terms, wideband audio means a higher quality of voice transmission. Wideband audio transmits a much fuller range of frequencies than traditional telephone transmissions, for a clearer, more natural sound. So wideband audio is easier to understand, which means fewer misunderstandings, shorter calls and happier callers. It also allows callers to concentrate on what's being said, instead of straining to decipher unclear words or muffled voices. The ultimate benefits are increased productivity, less fatigue—and more satisfied callers.
