

Preserve your investment in cable, speakers, and call buttons --
Simply replace the central control unit of your
Troublesome School Intercom System!

Valcom MultiPath XP is the ideal solution for quick, easy, and inexpensive school intercom retrofits!

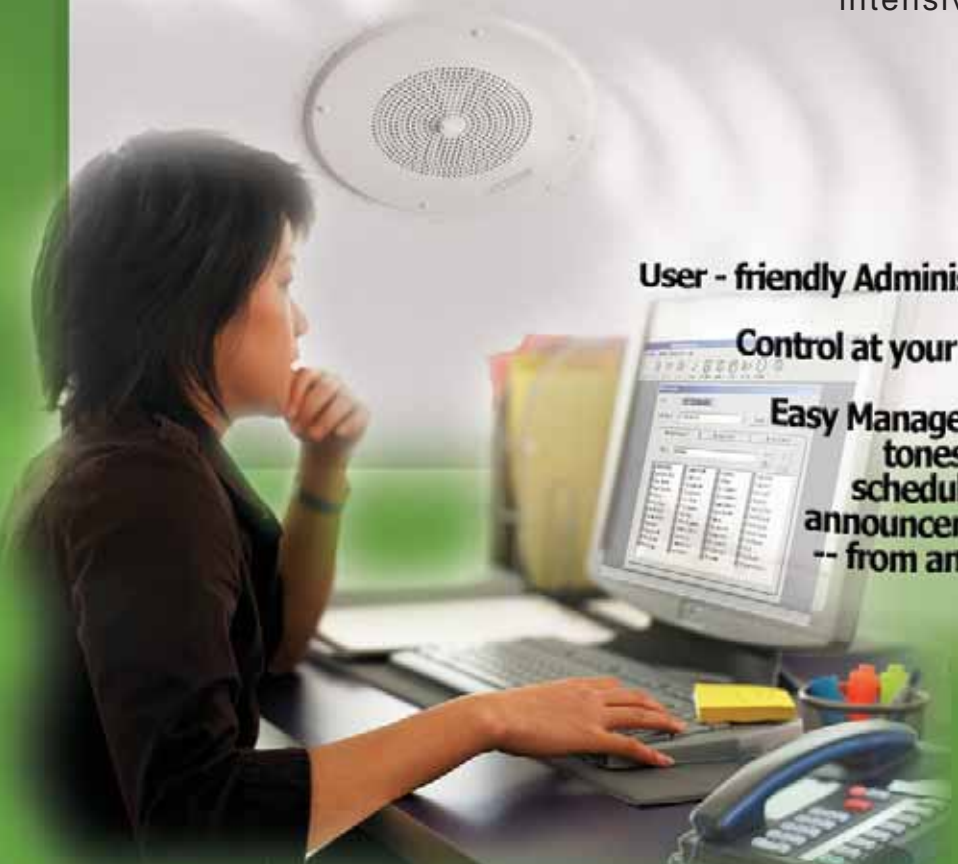

Valcom MultiPath XP easily replaces old-fashioned, outdated school intercom systems that often require constant attention and maintenance with a modern solution that easily fits into the maintenance budget. Simply replace the head-end equipment and it's done! Plug-N-Page™ technology makes it easy!

Easy installation!

Valcom MultiPath XP typically uses the existing cabling, speakers, call buttons, and telephone system. No need to run special cable or replace peripheral equipment. This capability alone provides an enormous cost savings! Simply remove the existing intercom control equipment and quickly install Valcom MultiPath XP.

Easy administration!

Valcom MultiPath XP is easy to program and allows on-site management and administration of schedules. With the user-friendly Administrative Software Tool, system features such as schedules, tones, and announcements can be easily modified – daily, weekly, monthly or annually! Administrative changes are easily made from any networked PC! The affordable Valcom MultiPath XP solution can even eliminate the annoying, labor-intensive bid process!

User - friendly Administrative Software

Control at your fingertips!

**Easy Management of
