

The Evolution Poke-Thru Device has the capacity to feed lights, computers, and cash registers to freestanding kiosks in an open space environment.

CHOOSE THE FINISH  
THAT BLENDS BEST  
WITH YOUR DÉCOR.

The Evolution Poke-Thru device isn't just tough. It's also smart and attractive. Instead of clumsy flip-up doors, the aluminum cover design features two spring-loaded sliding egress doors that hold cables securely, reduce trip hazards, and reduce the chances of damage to the poke-thru device. The Evolution device has plenty of smart design features. But it also looks good on-site, with your choice of brass, gray, black, nickel, or bronze covers.

The Evolution device can be installed in carpet or tile.

## Evolution 8AT Series Poke-Thru Devices Cover Assemblies Ordering Information
