2-Way Radio

Independent of the Base Unit

Expandable System Design

EnGenius is flexible. Each base unit can support up to 9 handsets. Each handset can be registered to up to 4 base units (4-lines or extensions). Additional handsets are available separately.

Obstacles, terrain, trees and atmospheric conditions can affect range. For best results, use tall handset antenna and locate the base as high as possible to improve line of sight coverage. For areas with many obstacles, an optional outdoor antenna with coaxial cable is available. EnGenius and Industrial Cordless are registered trademarks of EnGenius Technologies.
