## PRYMEBLU ADAPTER USER'S GUIDE For Compatible Wireless Audio Accessories

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This manual applies to the PRYMEBLU BT-500-H8 Bluetooth Adapter which fits Hytera P600 series, X1 series, and other compatible radios.

## Controls and Connection

### QUICK START

1. Connect the PRYMEBLU adapter to a compatible 2-way radio.
2. Pair the PRYMEBLU adapter with a compatible wireless audio accessory.
3. Test and use.

2

## Connecting the Adapter to Radio

### STEP ONE: Connecting to a Two-Way Radio

To connect your PRYMEBLU adapter to a two-way radio, follow these steps:

- \*Always turn off your two-way radio before connecting or disconnecting your PRYMEBLU adapter.
- \*Plug the PRYMEBLU adapter into the audio accessory jack of your two-way radio.
- \*Tighten the retaining screw at the bottom of the adapter to ensure that the PRYMEBLU adapter remains attached to the radio. DO NOT over tighten.
- \*You can secure the PRYMEBLU Adapter to your two-way radio or clothing using the Velcro fastener or belt clip.
- \*Turn on your two-way radio and verify that the radio transmits and receives with the adapter attached.
- \*Because no wireless audio accessory will yet be paired to the PRYMEBLU Adapter, received signals should be heard over the radio's internal speaker and transmitted signals will be sent using the radio's internal microphone.
- \*The Talk button on the PRYMEBLU Adapter will not function as a Push-to-Talk button for your two-way radio until a wireless audio accessory is successfully paired to the adapter.

## Connecting the Adapter to Radio

### USING THE FRICTION PAD (Velcro version)

The PRYMEBLU adapter is supplied with a rubber Friction Pad. This pad provides additional protection and stability when using the Velcro Fastener to attach the adapter to a radio or other location.

To install the rubber Friction Pad do the following:

1. Open the Velcro Fastener on the back of the PRYMEBLU adapter so that the two straps are separated.
2. Align the Friction Pad so that it is centered over the Velcro Fastener on the back of the adapter.
3. Slide one strap of the Velcro Fastener into one of the slots in the Friction Pad and pull the strap through.
4. Slide the other Velcro Fastener strap through the other slot in the Friction Pad.
5. Place the PRYMEBLU adapter in the position you wish to mount it and close the Velcro Fastener.
