

The Evolution of the Digital Revolution

The perfect blend of design functionality and style, Falcon is another award winning result of Samsung's \$7.9 billion dollar commitment to research and development. Samsung's Falcon is the perfect unity of sight and sound.

28 Button Speakerphone

Introducing the bold new Falcon. It is the perfect blend of design functionality and style. Falcon is another award winning result of Samsung's \$7.9 billion dollar commitment to research and development. Consider Falcon's advanced, optional Full Duplex speakerphone with external microphones- using the latest in DSP design technology, with board room quality speakerphone use and digital clarity. Falcon's Terminal Status Indicator (TSI), a bright, tri-color LED display light that provides immediate visual status - even from across the room; an incredibly useful feature in today's hectic office environment. Samsung's Falcon is the latest in high-end telecommunication solutions - the perfect unity of sight and sound.

Tri-Color Status Indicator

Tri-Color Terminal Status Indicator alerts everyone with an easy to see bright light.

Easy Dial Buttons

For effortless, mistake-free dialing, each button is right where it should be.

Two Stations in One Keypad

Completely independent station access means you can double the capacity of your station ports.

Programmable Keys

Fully programmable keys let you configure the system the way you want, providing maximum efficiency.

Samsung Your Business Lifeline

8 Button Speakerphone

The 8 Button Speakerphone is reduced in size, not power. It is the most cost-effective solution for companies that don't need sophisticated optional features, but still want the confidence of knowing they can handle high volume traffic with smooth efficiency.

18 Button Speakerphone

The 18 Button Speakerphone is ideal for the rapidly growing company who is cost conscious. Offering the same advanced features as the 28 Button Speakerphone, it is recommended for users who don't yet need all the capabilities the 28 button model offers.

28 Button Speakerphone w/14 Button AOM

The 28 Button Speakerphone is ideal for the established corporations whose business is telephone intense. From the receptionist to the busy executive, this phone does it all. You can add the optional 14 button module to the 18 or 28 button phone for even more flexibility.*

28 Button Speakerphone w/64 Button AOM

Samsung's Add-On Module offers 64 additional fully programmable buttons, providing any keypad with unbelievable versatility. You can add up to two 64 Button Consoles for supreme call coverage control.

28 Button Speakerphone w/Microphone

When you add the full duplex speakerphone option, you can convert our 18 or 24 button Speakerphones into a board room speakerphone with 3 additional external microphones.

Computer Telephony Module

Now you can use Computer Telephony Integration (CTI) - the most sought-after enhancement in the telecommunications industry - to easily interface with your personal computer. By combining the intelligence of your computer with the advanced features of our telephones, you can multiply your communications power many times over.

*Not all systems support the 14 button AOM. Ask your dealer for details.
