925CS Kit	Contains No. 925CS scissors	216mm / 8.5"	N/A

Claus's PUNCH DOWN TOOL

- Adjustable Impact
- Hardened Steel Blades
- Accepts a Variety of Interchangeable Blades
- Extra Blade Storage in Handle

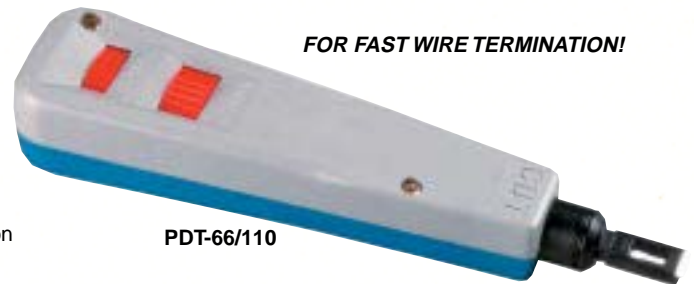

The Claus's PDT-66/110 Punch Down Tool allows fast and effortless wire terminations.

This spring-loaded adjustable, automatic impact tool is used for terminating wires on 110/88 or 66 – type connecting blocks.

Precision hardened and interchangeable blades spread the termination prongs to allow fast and easy insertion of the wire into the contact, providing a tight termination that resists corrosion. The blade finishes the job in the same motion by neatly cutting off excess wire.

No screwdriver is needed to change the blades or to adjust the spring tension. The impact of the blade can be adjusted simply by turning a thumb wheel. A sure-lock blade holder provides fast, easy blade changes and prevents pull-out during operation. And a convenient storage compartment with a unique locking mechanism provides storage for spare blades and helps prevent blade loss.

Tool is also available without blades.

FOR FAST WIRE TERMINATION!
