

Tired of Hearing Squeals when You Page?

Feedback Eliminator

V-5335611

Dimensions: 10.3" (26.16 cm) H x 7.8" (19.81 cm) W x 2.2"
(5.59 cm) D

Weight: 3.5 lb (1.58 kg)

The Feedback Eliminator Records The Message Then Broadcasts Over The Speaker System. Unit Has Two Input Ports. Will Record a Page While Playing One.

- Automatically adjusts the output level to a consistent volume even when the recording voices vary from low to high
- Stacks Messages - records a page while playing a recorded page
- Eliminate feedback to all zones with only one unit
- High-Fidelity - sounds like natural voice not like a recording
- Solid State Design - no moving parts to break
- LED indicators for play, record, busy, power
- Dipswitch Programmable Features:
 - Pre-announce alert tones
 - Priority override real time or delayed
 - DTMF message cancelling
- Real time background music with volume control
- Programmable to play message twice
- Screw terminal connections
- Access by loop start C.O. port or page port
- UL/CSA listed
