

All-In-One Floorbox Assembly with Solid Brass Floorplate

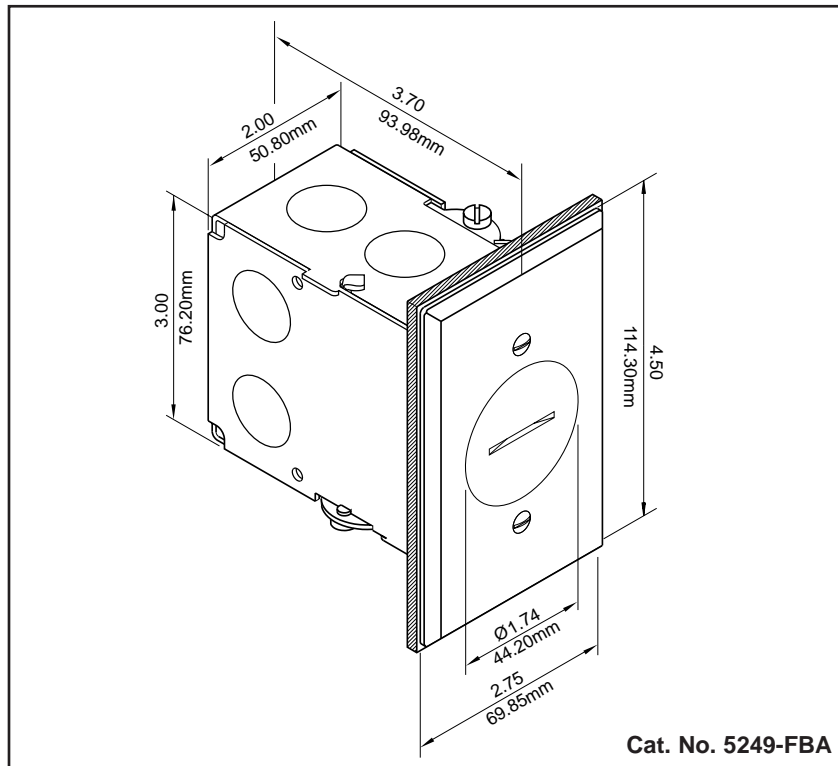

Leviton's new 15 Amp, 125 Volt Floorbox Assembly lets you install flush-to-the floor receptacles quickly and cost-effectively while offering a convenient way to connect electrical devices to power sources located directly at the user site. This sturdy all-in-one, ready-to-wire unit eliminates the need for unsightly wires and extension cords running from wall outlets.

- Complies with NEC 370-27(b)*
- All-in-one, ready-to-wire unit provides quick, easy installation
- Durable nylon receptacle face and body resist breakage
- Floorplate gasket and O-ring combine to seal out moisture and contaminants
- Brass floorplate and screw cap resist abuse and prevent contaminants from entering device
- 1/2" knockouts located on all four sides of box for maximum wiring flexibility
- Receptacle terminal screws are backed out and staked for easy, quicker wiring
- UL # 498

* Specifies that a floor application demands a listed Floorbox Assembly designed to seal out moisture and contaminants and to withstand floor-level traffic and impacts.

All-In-One Floorbox Assembly with Solid Brass Floorplate

Our Top Brass Lets You Make All the Connections You Need

The 15 Amp Display Receptacle offers a convenient way to connect electrical devices to power sources located directly at the user site.

QuickPort® Snap-in Jacks with brass floorplate and flush-fitting screw cap make point-of-use connectivity a snap for any commercial or residential installation.
