

NHX

CommuniCare Nurse Call System

DESCRIPTION:

The NHX CommuniCare System is a UL 1069 listed Nurse Call system providing staff alert and communications for a variety of health care applications: nursing homes, elder-care facilities, clinics, sub-acute wards, and hospitals. The system is compact, easy to use, and provides the highest quality voice communication, allowing staff to efficiently assess the needs of patients.

The NHX features a 50-call master station, with an optional 30-call add-on selector for capacity of up to 80 call stations.

Single or dual patient stations with bedside call cords, bathroom pullcord, dual-bulb corridor lamp, duty station, zone light, and common area call stations are all integrated to create the calling and communication system to fit the needs of a variety of health care facilities.

FEATURES:

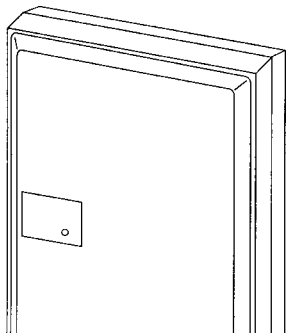

- **One 50-call master station, with optional 30-call add-on selector for up to 80 stations**
- **Flush mount patient stations, with one or two jacks for bedside call cords**
- **Dual bulb corridor lamp (white and red)**
- **Bathroom pull cord**
- **Common area restroom or staff call station**
- **Duty station**
- **4-Zone indicator light**
- **Central Control Unit for wiring and system control**
- **Easy common trunkage wiring**
