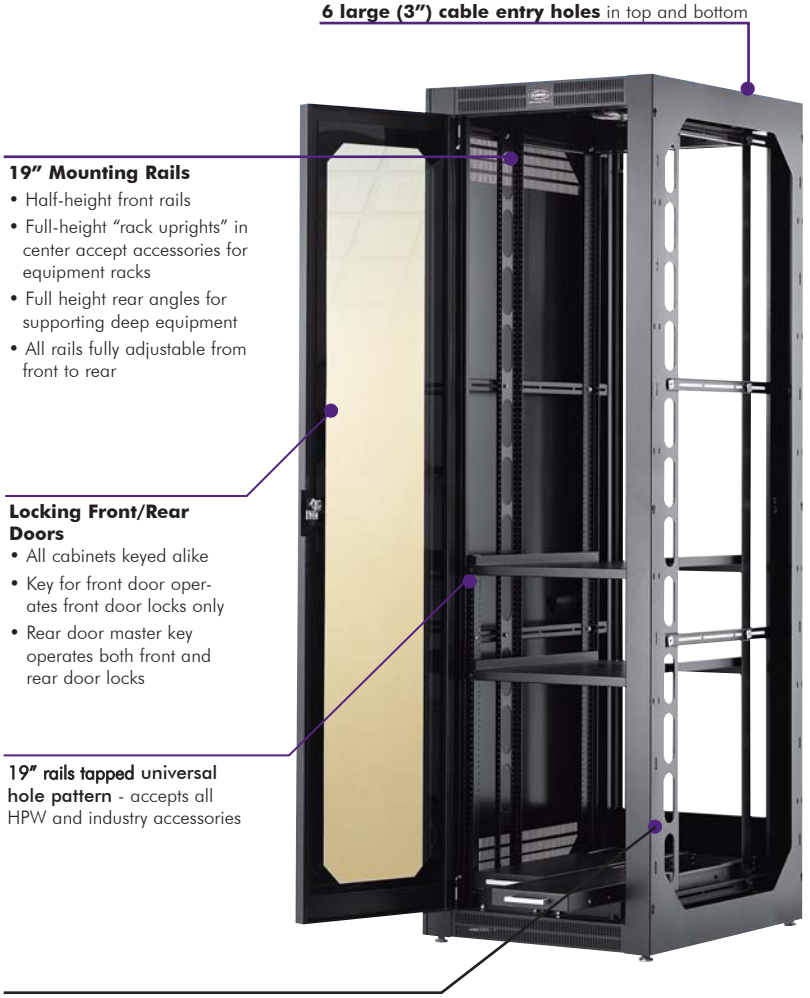
Premise Networking Cabinets

Completely Assembled

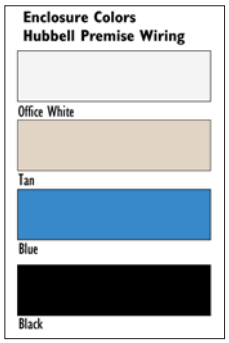
Modular Design

Welded Steel Construction



FEATURES

- 30" usable depth - great for handling tower-style network equipment
- Vented for excellent air circulation
- Side covers can be secured from the inside
- Durable, textured powder coat finish stocked in 4 colors:



SPECIFICATIONS

- 16 ga. welded steel construction
- Static weight load capacity: 800 lbs.
- 19" rails tapped #10-32 EIA-310-D
- 19" rails: 11 ga. CRS

APPLICATIONS

- Securely house cross connect equipment for commercial/LAN applications
- Suitable for housing tower-style servers
- Serves as a data center in small offices by housing active and passive equipment
- Serves as workstation cabinet housing for LAN equipment and accessories in warehouse and light factory-floor environments
- MDF for K-12 Schools

NOTE: If mounting rack-mounted servers, please select our SVR series Server Cabinets.

These cost-effective cabinets are specifically designed to house datacom equipment and large bundles of cable.

The cabinets are modular and provide for access to equipment via removable front and rear doors, and sides. Doors and side panels provide a streamlined appearance that complement any office environment.

Mount cross connect equipment such as patch panels and patch cord organizers towards the top of the cabinet on center "rack uprights" recessed from front door for proper bend radius allowance.

Mount deep, active equipment towards the bottom of the cabinet supported by the half-height front uprights and the full-height rear angles.
