

D814™ **Automatic** **Impact Tool**

more efficient and

uniform connections

with less effort

The D814 automatic impact tool is designed to be 10 tools in one! Just change the blade and you have another tool. A simple push triggers the adjustable D814 impact spring mechanism, providing more efficient and uniform connections with much less effort. You can even store an extra blade in the handle.

Features:

- Incredibly durable
- Works with complete family of blades
- Lightweight and easy to use
- Industry standard
- Automatic impact adjustment selects low impact for 24 and 26 gauge wire or high impact for 22 gauge wire
- Convenient blade storage built into the end of the D814 handle
- Easy blade insertion (locks in place)
