

ALTOS® Lite™ Gel-Free, Single-Jacket, Single-Armored Cables

A LANscape®
Solutions Product

features and benefits |

Fully waterblocked loose tube, gel-free design	Simple access and no clean up
Single-armored construction	Provides additional crush and rodent protection
High-strength ripcord	Ease of stripping
Medium-density polyethylene jacket	Rugged, durable and easy to strip
Available in 62.5 μm, 50 μm, single-mode and hybrid versions	Ready for any application including Gigabit Ethernet and 10 Gigabit Ethernet

Corning Cable Systems ALTOS® Lite™ Gel-Free, Single-Jacket, Single-Armored Cables are designed for campus backbones in direct-buried installations. The loose tube design provides stable and highly reliable transmission parameters for a variety of voice, data, video and imaging applications. These cables also provide high-fiber density within a given cable diameter while allowing flexibility to suit many system configurations. The single-armored construction provides additional crush and rodent protection with a high-strength ripcord under the armor for easy stripping. Gel-free means the cables are fully waterblocked using craft-friendly, water-swallowable materials which make cable access simple and require no clean up. The flexible craft-friendly buffer tubes are easy to route in closures, and the SZ-stranded, loose tube design isolates fibers from installation and environmental rigors while allowing easy midspan access.

ALTOS® Lite™ Gel-Free, Single-Jacket, Single-Armored Cables

A LANscape® Solutions Product

These cables have a medium-density polyethylene jacket that is rugged, durable and easy to strip.

fibers with Gigabit Ethernet and 10 Gigabit Ethernet performance. These cables are also available with optional extended operating temperature to -50°C (-58°F) in a variety of fiber counts.

A variety of fiber types are available including 62.5 µm, 50 µm, single-mode and hybrid versions as well as

specifications |

Maximum Tensile Loads Short-Term: 2700 N (600 lbf)
 Long-Term: 890 N (200 lbf)

Temperatures Storage: -40° to +70°C (-40° to +158°F)
 Installation: -30° to +70°C (-22° to +158°F)
 Operation: -40° to +70°C (-40° to +158°F)

Common Installations Outdoor lashed aerial and duct and direct-buried; indoor when installed according to National Electrical Code® (NEC®) Article 770

Design and Test Criteria ANSI/ICEA S-87-640

Corning Cable Systems recommends storing cable in a proper temperature environment prior to installation to allow the cable temperature to meet installation temperature range specifications for best installation results.

Fiber Count	Maximum Fibers per Tube	Number of Tube Positions	Number of Active Tubes	Central Member	Nominal Cable Weight kg/km (lb/1000 ft)	Nominal Outside Diameter mm (in)	Minimum Bend Radius Loaded cm (in)	Installed cm (in)

* Assumes 1.0 dB maximum total connector/splice loss.

** Assumes 0.7 dB maximum total connector/splice loss.

*** Meets 0.75 ns optical skew when used in all Corning Cable Systems Plug & Play™ Systems solutions.

**** ITU 652.D compliant.

Notes:

- 1) Improved attenuation and bandwidth options available.
- 2) Bend-insensitive single-mode fibers available on request.
- 3) Contact Corning Cable Systems Customer Service Representative for additional information.
