

Valcom Clocks

Revolutionary New Wireless Clock System...

Manage the day's schedule more efficiently!

Simple and easy to install, Valcom's new wireless clock system offers the high reliability of a mesh network. Every clock acts as a repeater and can be synchronized with any time source: master clock, Internet or GPS.

Mesh Network Wireless Clock Systems are designed to provide:

- Precision Time Keeping — Improve Time Management
- Increase Efficiency Without Cable!
- Wireless Clock Correction-Both Analog & Digital
- Each Valcom Clock Receives Wireless Signal Then Becomes a Transmitter & Repeater
- Each Clock Increases Signal Quality Through Building
- Battery Clocks Transmit/Receive Signal Once Every Four Hours at 12, 4 & 8 O'Clock
- 24 & 110-Volt Models Transmit/Receive Data Every Minute
- No License Required
