25190-001

Cable Port Brush Kit

Use to cover the large cable knockouts in the cabinet’s top panel. Each kit includes two 3.9” x 8.8”D (99 mm x 224 mm) brush-sealed grommets that snap into the opening on the top panel once the large 4.5”W x 9.0”D (114 mm x 228 mm) knockout is removed. The split design also allows the grommet to be temporarily removed to pass large power plugs through the knockout when power is added or removed.

35021-000

Cable Port Grommet Kit

Use kit to cover the round cable knockouts in the cabinet’s top panel. Each kit contains two 2.8” (71 mm) diameter grommets that snap into the openings in the top panel once the knockout is removed. The standard and fan top panels have four round knockouts and four openings that include grommets.

25107-001

Snap-In Grommet Kit

Kit includes fourteen 5.5”H x 3.25”W (140 mm x 83 mm) grommets that protect cables from the edges of the openings in the equipment mounting rails in 750 mm and 800 mm wide cabinets. Each rail has seven openings. The Snap-In Grommet Kit cannot be used with the Rail Seal Kit (P/Ns 25250-70X or 25252-70X).

25108-001

Snap-In Grommet and Plug Kit

Includes 14 individual snap-in grommets with covers that seal the openings in 750 mm and 800 mm wide equipment mounting rails. Each rail has seven openings. Use one kit to seal all of the openings on the front pair of equipment mounting rails. The Snap-In Grommet and Plug Kit is an alternative to the Rail Seal Kit (P/N 25250-70X or 25252-70X).

25242-701

Baying Seal Kit

The Baying Seal Kit is used to seal the gap between 600 mm cabinets (of the same height and depth) when they are centered on 24” (610 mm) floor tiles. The kit includes six snap-in plastic seals; three that seal the front gap and three that seal the rear gap. Baying Seal Kit works with or without side panels. No hardware required.

Part Number	Description	Shipping Weight lb (kg)
25190-001	Cable Port Brush Kit, Pack of 2	2 (0.9)
