800 Series Floor Box, An Economical Single Service Solution

The 800 Series Semi-Adjustable Floor Box provides an excellent and economical activation solution for the low density power or communication requirements in open space areas. The 800 Series Floor Box is available in stamped steel and cast iron construction and is suitable for both on or above grade applications. The 800 Series gives an aesthetic, low profile appearance that allows you to activate your wiring without obstructions. Typical applications would be in any large open space area. Activations for these boxes can be flush or pedestal type. The flush activation option offers an aesthetic brass look. The 525 Series Service Fitting can be used with the 800 Series Floor Box to offer a die-cast aluminum pedestal activation. All activation covers are interchangeable for stamped steel and cast iron boxes.

800 Series steel and cast iron floor boxes.

Features & Benefits

- **Stamped steel construction.** Meets requirements for above grade applications. Lower cost alternative to cast iron boxes on above grade applications.
- **Activation flush or pedestal.** Flexibility to meet power or data wiring requirements. Variety of aesthetically pleasing cover options.
- **Single power receptacles available.** An inexpensive option for low density power requirements for open space areas.
- **Covers are interchangeable for cast iron and stamped steel.** More activations to meet any decor.
