

➤ **W10/W10BP–In Line Amplifier Series**

➤ **What are they?**

An AC-powered (W10) or battery-powered (W10BP) in-line receiver amplifier.

➤ **What do they do?**

Allows the user to amplify the receiver (up to 20dB) using their current unamplified handset.

➤ **Features & Benefits**

The W10/W10BP easily installs between the existing telephone base and the current handset, and improves listening volume up to 20 dB for clearer reception. It uses a rotary (thumb wheel) volume control to adjust to individual hearing needs. Choose the power supply for your needs. Portable for travel and is compatible with electronic or standard phones. (The dial pad must be in the base of the phone.) Perfect for the hearing impaired.

The W10 series boost the receiver volume over three times the normal level, making hard-to-hear calls easier to hear.

Amplifier shown: W10

▶ **Technical Features**

SPECIFICATIONS FOR THE W10 AND W10BP

Amplifier Gain:	+ 24dB
Frequency Response:	Flat within ± 5 dB from 300 Hz to 3000Hz
Total Harmonic Distortion:	Less than 5% from 300 Hz to 3 kHz at maximum volume
Input Impedance:	150 Ohms Nominal
Output Impedance:	330 Ohms Nominal
Receive Level Limiting:	124 dBSPL (typical 150 Ohm receiver)
Power Supply:	W10BP: Two AA Batteries (Alkaline-type recommended and included) W10: AC/DC power supply (included)
Battery Life:	Greater than 6 months typical
Available colors:	Ash, Black, Ivory or Pearl
